

HSP1 Keyless Puck Lock with Teleporte Embedded

Bring the power of Teleporte to your most demanding environments. HSP1 combines the strength and security of a hidden shackle padlock with the flexibility and accountability of keyless digital access.

Built for industrial durability, HSP1 is ideal for securing enclosures, vehicles, gates, storage, or anywhere that demands tough, tamper-resistant protection with full digital oversight.

Why HSP1

HSP1 eliminates the hassle of managing and replacing physical keys while giving you complete visibility into who accessed what, when, and where.

Eliminate lost keys and manual rekeying

HSP1 removes the need to manage or replace physical keys by enabling secure, digital credentials that can be issued or revoked instantly.

Fast, flexible installation anywhere

HSP1 is perfect for remote or mobile assets. Install HSP1 on existing hasps, gates, or enclosures with no wiring, networking, or power.

Combine rugged protection with digital control

HSP1 combines the strength of a hidden shackle puck lock with Teleporte's powerful digital audit trail for complete visibility and control.

Ideal for:

Critical Infrastructure

Increase operational efficiency with keyless access for enclosures and field equipment.

Logistics & Trucking

Ideal for high-security applications, with all the durability logistics demands, from trailers to cargo gates.

Warehousing

Simplify access control for employees and vendors with a modern, scalable connected solution.

Teleporte HSP1 Keyless Puck Lock

Features & Benefits

Quick & Simple Installation

Mount HSP1 on existing hasps or hardware in minutes. No wiring, networking, or special tools required.

Offline Access, Anywhere

Operates securely without cellular or Wi-Fi connectivity, ideal for remote or mobile assets.

Built for Harsh Environments

Rugged, weatherproof, and impact-resistant design ensures reliable performance in the field.

Tamper-Resistant Construction

Hidden shackle design prevents cutting and prying, keeping your assets protected from physical attacks.

Digital Oversight & Auditability

Every unlock is time-stamped and recorded through the Teleporte platform for full visibility and accountability.

Scalable Digital Key Management

Add, remove, or modify digital credentials instantly, across one site or thousands, without rekeying.

Battery-Optimized for the Field

Engineered for long battery life, with maintenance tools that simplify tracking and replacement.

Powered by Teleporte

Manage users, credentials, and audit logs from a secure cloud-based dashboard that scales with your operations.

The Smart Choice for High-Security Field Access

HSP1 brings keyless access control to the toughest environments, delivering rugged protection, digital accountability, and unmatched flexibility for fixed and mobile assets.
