

KSC1 Keyless SFIC Core with Teleporte Embedded

Digitize your existing SFIC locks without replacing your hardware

The KSC1 brings the power of keyless access management to your existing SFIC (Small Format Interchangeable Core) locks – the most widely used cores in storage rooms, cabinets, lockers, cages, and more.

Why KSC1

With KSC1, you get all the benefits of digital keys without the cost and complexity of replacing your current lock hardware. Simply swap out your mechanical cores for KSC1 electronic cores and instantly transform your access points into smart, secure, and scalable entryways.

Solve costly, complex rekeying once and for all
KSC1 simplifies rekeying by enabling instant digital updates with no physical key changes required.

Digitize your access, retain your hardware
Keep your existing SFIC-compatible padlocks and doors while adding the flexibility of Teleporte's trusted digital access platform.

Low cost, high impact
KSC1 delivers enterprise-grade security and control, making it ideal for a variety of applications, at a lower cost than wired access control.

Ideal for:

Retail

Control dozens of access points across thousands of stores to combat theft and shrink.

Healthcare

Secure sensitive equipment and controlled substances with strict, auditable access.

Higher Education

Limit risk and protect valuable assets with reliable keyless access.

Government

Protect sensitive spaces with a cost-effective and secure digital solution.

Teleporte KSC1 Keyless Switch Core

Features & Benefits

Versatile Compatibility

Fits nearly any SFIC lock in your facility, from file cabinets to storage rooms to cabinets.

Quick & Easy Installation

No advanced training needed. Swap cores in minutes and start managing access digitally.

Scalable & Flexible

Add KSC1 cores wherever and whenever you need to control access points one-by-one or at scale.

Battery-Optimized

Long battery life with easy maintenance tools included for hassle-free replacements.

Tamper-Resistant Design

No exposed fasteners or attack points, ensuring your access points remain secure.

Integrated with Teleporte Platform

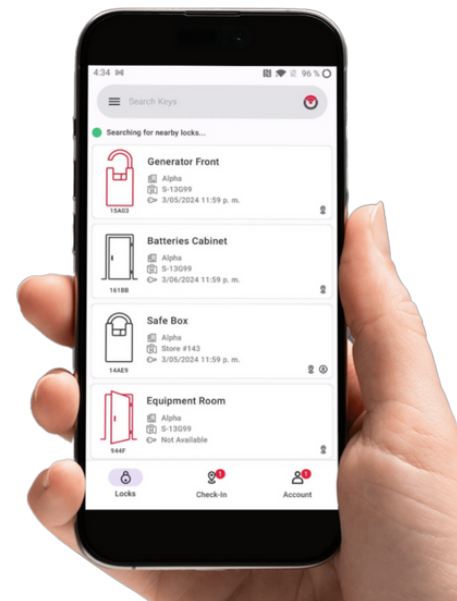

Manage credentials, audit access events, and monitor usage all from one powerful cloud-based system.

Reduces Risk & Saves Time

No more lost or stolen mechanical keys. Easily grant, revoke, or audit access rights in real time.

The Smart Choice for SFIC Access Control

KSC1 transforms your existing SFIC infrastructure into a modern, secure, and easy-to-manage keyless access system, unlocking new possibilities while reducing cost and risk.
